

Year 1

Summer Term 1

Where do rockets take us?

We will be reaching for the stars this term! We will be learning about the history of flight and how this has culminated in travelling to the moon.

We are reading *Beegu* by Alexis Deacon and *Look Up* by Nathan Bryon.

We will be writing information leaflets and a recount of our trip to the planetarium.

We are learning how to measure using different equipment. We will be practising our multiplication and division.

We are learning about the first expedition to space and Tim Peake's journey to the International Space Station.

Skip to the Beat!
We are improving our agility, balance and coordination.

We are learning about relationships and special people. After this we are learning about body parts.

In Design and Technology we will be designing and making a fridge magnet.

We are astronauts!
We are learning to code.

We are learning a new song called 'Come dance with me'.

We will continue to explore the properties of everyday materials. How can we make a strong and sturdy paper bridge?
